The teathionials below give proof that none is MORE SUC. GRSSFUL AT THE PATENT OFFICE than the subscriber; and as SUCCESS IS THE REST PROOF OF ADVANTAGES AND ABILITY, he would add that he has shundant reason to believe, and can prove that at no other office of the kind are the charges for professional acrices as moderate. The immense practice of the subscriber during twenty years past has enabled him to accumulate a vast collection of specifications and official decisions relative to networts. These besides his oxtensive library of legal and mechanical works, and full accounts of pagents granted in the United States and Europe, render him able, beyond question, to offer superor facilities for obtaining patents.

All necessity of a journey to Washington to proours a patent, and the usual great delay there are here saved inventors.

THE PEOPLE!

Some love the glow of outward show,

Some love the glow of cutward show,
isome love mere wealth, and try to win it;
The house to me may lowly be,
If I but like the people in it.
What's all the gold that glitters cold,
When linked to hard or taughty feeding?
What'er wire told, the nobler gold
Is truth of heart and manly denting.
Then let them seek, whose minds are weak,
More isshion's smile, and try to win it;
The house to me may lowly be,
If I but like the people in it!

A lowly roof may give us proof
That lowly flowers are often fairest;
And trees where bark is hard and dark
May yield us truit, and bloom the rarest.
There's worth as sure 'reath garanents poor,
As o'er adorned a loftice station;
And minds as just as those, we trust.
Whose claim is but of wealth's creation.
Then let thom seek, whose minds are weak,
Mere fashion's smile, and try to win it;
The house to me may lowly be,
If I but like the people in it.

Translated from the French] THE MYSTERIOUS SKETCH. (Concluded.)

"It is he!" I stammered, with a halfchoked voice. "He is there—there—and 1—I am about to die to exvinte his crime. What shall I do? what shall I do?

A sudden thought from heaveninspire me. I put my hand into my pocket—my crayons were there. Then springing to the wall, I began to trace the seene of the murder with almost supercatural energy. No more uncertainty, no more hesitating experience. I knew the man. I reproduced him before me.

At ten o'clock the jailer appeared in my elt. His owlish stapidity gave place to admiration.

"Go, seek my judges," I said, pursuing my work with increasing exultation.

"They are waiting for you in the criminal hall," he replied.

"I wish to make some revelations," I

wish to make some reventions, I continued, putting the last touch to the mysterious personage.

In a few minutes the two judges came. They looked on stupefied. With one hand

extended to the picture, and trembling in every limb, I called out: There is the assassin!"

Van Spreckdal, after a moment's silence. isked his name.

"I do not know it," I answered : but he is there now in the market, in the third stell at the left, shouning most," and turning toward his colleague.

"Let them find the man," replied the

other, in a grave tone.

Some of the keepers went out to obey
the order. The judges remained standing,

The noise of steps beneath the resounding arches of the corridor awakened me. The man entered. Van Spreckdal pointed in silence to the picture. He looked at it a moment, turned pule, then, with a roar, which chilled us with terror, he struck out his energous arm, and with one hound which chiled is with territ, he sation of bound was out the door. There was a fearful contest in the corridor. We heard the panting respiration of the butcher, low impressions, brief words, and the sound of atruggling feet. It was over. The man re-entered. His bead was howed; his eyes were bloodshot; his hands bound be-bind his back. He fixed his gaze once upon the picture, appeared to reflect, then, in a voice, as if speaking to himself, he said: "Who could have seen me?—at midnight."

I was saved.

Many years have passed since this termible adventure. I no longer cut profiles or paint portraits of burgomasters. By dint of labor and perseverance, with the blessing of God, I gain an honorable subsistence by such labors as can alone satisfence by such labors as can alone satisferementurance of the nocturnal electch has large left me. How could a crime, committed by a man I did not know, in a place which I had never seen, be reproduced under my pencil, even to its smallest details. Was it a chance? No! And, braides what is chance, after all, but the effect of a cause of which we are ignorant?

WATER OIL!!

I BBARD'S PATENT WATER OIL, to burn in Kerosene Lamps, without the smell and smoke of the Coul Oils, is the great est artificial light yet discovered. It gives a steady, clear, soit light and does not choke the lungs with foreign matter, such as results generally from using Rosm and Kerosene Oils or Coal Gas.

The flame can be regulated to afford any amount of light desired, from that of the large soier lamp to the feebleat taper. We therefore claim for the Water Oil the following as some of its leading characteristics:

1. It emits no feetid odor.

2. I will burn in Kerosene Lamps without alteration.

alteration.
3. It is essentially an Oil, and yet will not

3. It is essentially an Oil, and yet will not grease the most delicate fabric.

4. It is less volatile than other oils, consequently will not consume as rapidly.

5. The flame is more purely white and soft than that of any other Oil or Fluid. Therefore less injurious to the eyes.

6. The wick may be raised to a great height and breadth, giving an immense illuminating power without producing smoke.

7. Its great specific gravity conders it not only safe, but the most economical Oil in existence.

8. It does not crisp the wick like Oils, nor deposite any carbonaceous fuel upon it.

9. It does not waste, as every globule of Oil and every particle of Water is entirely consumed.

The following is the Certificate from Dr. Hayes, on the illuminating power of the WATER OIL as compared with the best article of Rerosene Oil in the market:—

16 BOYISTON STREET, 14th Feb. 1860.
Results of comparison of the light of two lamps, one fed with Kerosene Oil, and the other with Water Oil, furnished by B. F. Hebard.

other with Water Oil, furnished by B. P. Hebard.

The Kerosene Lamp when lighted soon increased its volume of fisme, so as to present a duth halo shove the brilliant part; it was adjusted to the highest point without producing smoke. On lighting the lamp fed with Water Oil, it was found that its fisme was in minous and might be much extended, without the production of smoke. A definite point perfectly practical, was reached, when the Kerosene Lamp belog 109, the Water Oil Lamp afforded the light of 132, without a trace of smoke emitted. The Water Oil permits of any diminution in the fisme without loss of economy.

Respectfully,

Itespectfully,
A. A. HAYES, M. D., State Assayer.

ST. NICHOLAS HOTEL,
Rendway, New York.

WHEN COMPLETED, sky years ago, the
St. Nicholas was universally pronounced the most magnificent, convenient,
and theroughly organized establishment of
the kind on this continent. What it was
then it remains to-day—without a rival in
size, in sumptuousness, and in the general
elements of comfort and enjoyment. The
Hotel has accompodations for 1,000 guests,
including 100 complete suites of aparture, ta
for families. Six hundred persons can be
comfortably seated at the tables of its three
pablic dining suoms, and nothing that mod
ern art has devised for the convenience and
social gratification of the traveling public has
been omitted in its plan, or is neglected in
its practical details. The early reputation of
the house at home and alroad, derived from
its magnitude, its superb appointments, and
its home-like comforts and luxuries, has been
chanced every year by the unwearled exertions of the proprictors.

A report received on Saturday, that an easault had been made on Mr. Senator Summer, at his residence in Washington, occasioned much excitement and universal regret. It appears that, soon after sunset on Friday, a fellow—who represented himself as one of four persons who had comfrom Virginia—obtained admission to Mr. Summer's room, and demanded an explanation of certain insults contained in the Senator's recent speech on slavery. He is described as violent, and as having uttered threats against the life of Mr. Sommer. He finally retired. It is stated that at a later hour, three persons called at Mr. Summer's door, and sent him a message to the effect " that they wished to see him alone." The Senator, who was by this time surrounded by his friends, invited them up stairs; but they would not "walk into the parlor;" and after some awearing and threatening, and promising to return in the morning, they withdrew.
Some of Mr. Sumuer's friends, remained with bim all night, and attended him to the Senate Chamber on Saturday morning. The attention of the police had been called to the affair, and the chief offender has been arrested.
